Verse 3:

My thoughts are misguided and a little naïve
I twitch and I salivate like with myxomatosis.
You should put me in a home
Or you should put me down.

I got myxomatosis
I got myxomatosis.

Yeah, no one likes a smartass but we all like stars
That wasn't my intention
I did it for a reason
It must have got mixed up
Strangled, beaten up.

I got myxomatosis
I got myxomatosis.

And now I don't know why (*etc.*)

GUITAR TAB GLOSSARY**

TABLATURE EXPLANATION

READING TABLATURE: Tablature illustrates the six strings of the guitar. Notes and chords are indicated by the placement of fret numbers on a given string(s).

String 6 3rd Fret String 1 12th Fret A "C" Chord "C" Chord Arpeggiated String 3 13th Fret

BENDING NOTES

HALF STEP: Play the note and bend string one half step.*

PREBEND (Ghost Bend): Bend to the specified note, before the string is picked.

WHOLE STEP: Play the note and bend string one whole step.

PREBEND AND RELEASE: Bend the string, play it, then release to the original note.

WHOLE STEP AND A HALF: Play the note and bend string a whole step and a half.

REVERSE BEND: Play the already-bent string, then immediately drop it down to the fretted note.

QUARTER-TONE BEND: Play the note and bend string slightly to the equivalent of half a fret.

BEND AND RELEASE: Play the note and gradually bend to the next pitch, then release to the original note. Only the first note is attacked.

*A half step is the smallest interval in Western music; it is equal to one fret. A whole step equals two frets.

UNISON BEND: Play both notes and immediately bend the lower note to the same pitch as the higher note.

DOUBLE NOTE BEND: Play both notes and immediately bend both strings simultaneously.

BENDS INVOLVING MORE THAN ONE STRING: Play the note and bend string while playing an additional note (or notes) on another string(s). Upon release, relieve pressure from additional note(s), causing original note to sound alone.

BENDS INVOLVING STATIONARY NOTES: Play notes and bend lower pitch, then hold until release begins (indicated at the point where line becomes solid).

UN-SPECIFIED INTERVAL: The pitch of a note or a chord is lowered to an unspecified interval.

HARMONICS

NATURAL HARMONIC: A finger of the fret hand lightly touches the note or notes indicated in the tab and is played by the pick hand.

ARTIFICIAL HARMONIC: The first tab number is fretted, then the pick hand produces the harmonic by using a finger to lightly touch the same string at the second tab number (in parenthesis) and is then picked by another finger.

TREMOLO BAR

SPECIFIED INTERVAL: The pitch of a note or chord is lowered to a specified interval and then may or may not return to the original pitch. The activity of the tremolo bar is graphically represented by peaks and valleys.

ARTIFICIAL "PINCH" HARMONIC: A note is fretted as indicated by the tab, then the pick hand produces the harmonic by squeezing the pick firmly while using the tip of the index finger in the pick attack. If parenthesis are found around the fretted note, it does not sound. No parenthesis means both the fretted note and A.H. are heard simultaneously.

RHYTHM SLASHES

STRUM INDICATIONS:
Strum with indicated rhythm.

The chord voicings are found on the first page of the transcription underneath the song title.

SINGLE NOTES IN SLASH NOTATION:
A regular notehead indicates a single note. The circled number below the note indicates which string of the chord to strike. If the note is not in the chord, the fret number will be indicated above the note(s).

FRETBOARD TAPPING:
"Tap" onto the note indicated by + with a finger of the pick hand, then pull off to the following note held by the fret hand.

TAP SLIDE:
Same as fretboard tapping, but the tapped note is slid randomly up the fretboard, then pulled off to the following note.

SHORT GLISSANDO:
Play note for its full value and slide in specified direction at the last possible moment.

PICK SLIDE:
Slide the edge of the pick in specified direction across the length of the string(s).

TRILL:
Hammer on and pull off consecutively and as fast as possible between the original note and the grace note.

ACCENT:
Notes or chords are to be played with added emphasis.

ARTICULATIONS

HAMMER ON:
Play lower note, then "hammer on" to higher note with another finger. Only the first note is attacked.

BEND AND TAP TECHNIQUE:
Play note and bend to specified interval. While holding bend, tap onto note indicated.

MUTED STRINGS:
A percussive sound is made by laying the fret hand across all six strings while pick hand strikes specified area (low, mid, high strings).

STACCATO (Detached Notes):
Notes or chords are to be played roughly half their actual value and with separation.

LEFT HAND HAMMER:
Hammer on the first note played on each string with the left hand.

LEGATO SLIDE:
Play note and slide to the following note. (Only first note is attacked).

PALM MUTE:
The note or notes are muted by the palm of the pick hand by lightly touching the string(s) near the bridge.

DOWN STROKES AND UPSTROKES:
Notes or chords are to be played with either a downstroke (v) or upstroke (^) of the pick.

PULL OFF:
Play higher note, then "pull off" to lower note with another finger. Only the first note is attacked.

LONG GLISSANDO:
Play note and slide in specified direction for the full value of the note.

TREMOLO PICKING:
The note or notes are picked as fast as possible.

VIBRATO:
The pitch of a note is varied by a rapid shaking of the fret hand finger, wrist, and forearm.
